Presentation by Marlena – She is the Climate and Energy Planner at NRPC and shared re: her role there. She is available to help with various projects. One of those is a Window Dresser (WD) event. They will offer them at reasonable prices and will make them available at lower costs to those in need. The MCC is welcome to spread the word about this. Community volunteers will measure windows and then do the building of the inserts in the Fall of this year. All agreed that it was a great idea. Marlena provided the MCC with fliers with information about the project for dissemination. Other examples of Marlena's interests include helping towns with grants, supporting energy committees, development of more electric vehicle (EV) charging sites, spreading information about EVs.
